

## **Avionics Technician**

### Job Summary:

The Avionics Technician will maintain, repair, and inspect aircraft to ensure safe operations within guidelines set by the Federal Aviation Administration (FAA).

### A successful candidate will:

- Be well versed in a wide variety of business aircraft such as Gulfstream, Citation, Learjet, Challenger, Hawker, Beechjet and King Air.
- Have the ability to work unsupervised.
- Be able to work 1st, 2nd or weekend shift as assigned.
- Have a working knowledge of FAR 145, 135, 91, 43 and 65.
- Have previous experience working for an FAA 145 Repair Station or a 135 Operator (preferred but not necessary).
- Hold an FAA Airframe and/or Powerplant certificate (preferred but not required for the right candidate).
- Have experience using pitot static and NAV COM test equipment (required).
- Have previously held an FAA Repairman's Certificate (preferred).
- Have experience troubleshooting various autopilot, navigation, communication system problems.
- Have experience with various satellite, telecommunication and data communications systems.
- Have experience with new avionics installations.
- Be able to read and interpret wiring diagrams and engineering prints.
- Be able to train, coach, and support other employees.
